

Adjudication

Shared visibility. Increased productivity.

Adjudication provides case management and reporting for adjudication of background investigations, incidents, and alerts; as well as component adjudication, due process, and appeals. The Adjudication capability modernizes this process by synthesizing gathered information, freeing staff to focus on their core responsibilities: validating and approving the clearance decision.

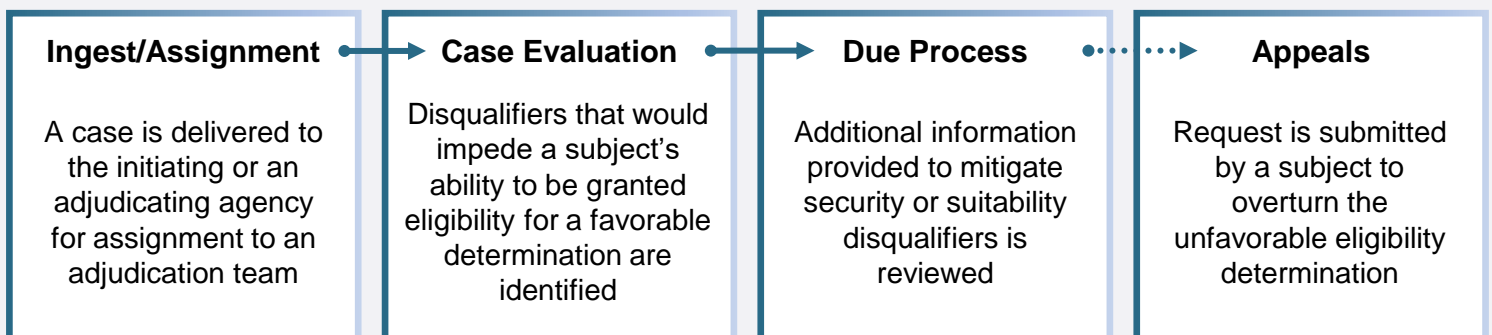

Adjudication cases include sets of expandable guidelines: National Security, Suitability and Fitness, and HSPD-12 Credentialing.

More seamless case processing.

The many benefits NBIS brings to Adjudication:

- » See all Adjudication determinations at-a-glance
- » Facilitate communication between internal and external parties to progress cases
- » Restrict access to only assigned users
- » Enable seamless case reciprocity between agencies
- » Log historical notes and attachments to record accountability and provide context
- » Standardize file organization and ensure easy access to accurate, real-time data

How Adjudication works:
