

NI2 PRODUCT DELIVERY ROADMAP

FY 2026		FY 2027			
Q3	Q4	Q1	Q2	Q3-Q4	
Enable Multiple Role Registrations	Trust Restricted Integration Capability Release (CR)	Widget Builder	Custom Trackers and Reports	Proactive Threat Intelligence MVCR	
Inventory Management		Report Builder	Facility Clearance Lifecycle MVCR	PSI Survey	
Comment Services	FOCI Risk Mitigation DFARS CR	Custom Dashboards		CMAR Generation	Legacy Backlog Burndown
Document Services	Field Office Support	Meeting Tracker	Workload Balancing	External Collaboration	
Address Validation Service		P2P Messaging	NISS Inc I Data Migration Tool	FCL Risk Indicators and Alert Generation	Conflict Alerts and Notifications
Physical Locations (Addresses)		Safeguarding	NISS Inc I Data Migration • Risks • Company Structure • ISRs, KMP, & other positions • Mitigations and Agreements • Security Reviews • Field Office Data	Threat and Vulnerability Insights	DIB Engagement Industry Pilot
Entity Extraction Integration		Mitigations and Agreements		Internal Collaboration	DIB Engagement MVCR
Trust Restricted Integration		Facility Verification		Follow-Up Action Management	
FOCI Integration		Security Reviews & Inspections			
DFARS CF Backlog Burndown		eMASS Connection			
AI/ML Risk Illumination Pilot		DISS Exchange			
Out of Office Scheduling		Engagement Framework & Governance	Data Recovery		
Risk Management			SF328 Data Structure		
Contract Management		SF328 Transformation			
Company Structure		Emails and Notifications			
FCL Data		Case Management			
Person Unification		Streamlined Engagement Scheduling			
Manage ISRs and other positions		Document Management			
Action Tracker		Post-Engagement Reporting & Remediation			
Checklist Integration					

Notes:

- A **Capability Release (CR)** provides a set of functional enhancements, whereas a **Minimum Viable Capable Release (MVCR)** is the first operational, "minimum" version of software, specifically tailored to provide actionable value to users as part of the associated Value Stream while ensuring safety, security, and performance. MVCR is tailored to software acquisition paths, emphasizing the smallest usable, fieldable unit.
- Enhancement prioritization with Stakeholders to begin May 2026; May shift priorities for Value Stream enhancements

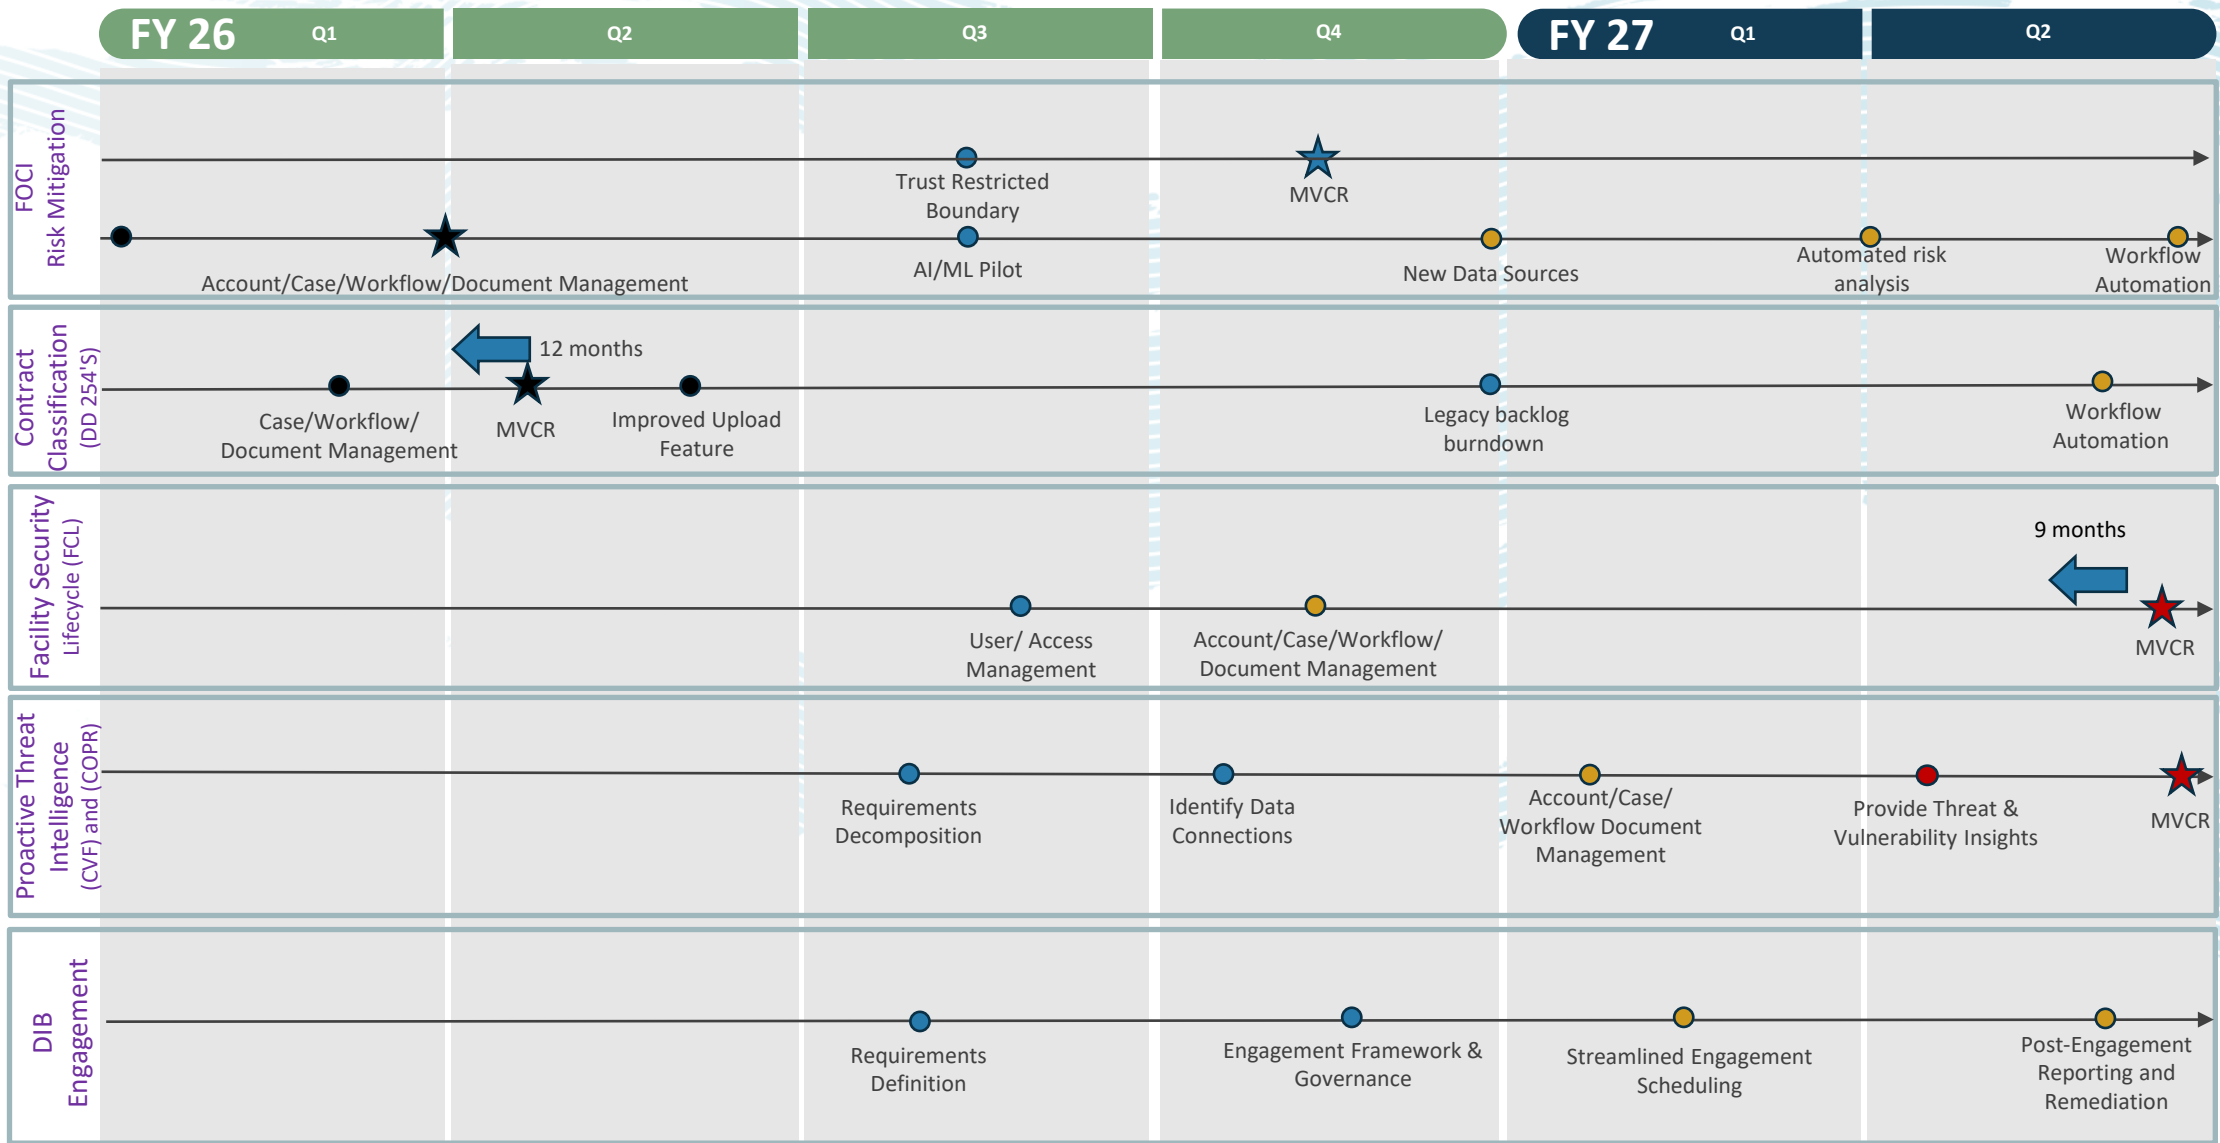

LEGEND

Minimum Viable Capability Release (MVCR) & Capability Releases

Value Streams

- NI2 Core Development
- FOCI Risk Mitigation
- Facility Security Lifecycle
- Classified Contract Execution
- Proactive Threat Intelligence
- DIB Engagement
